

LightScribe discs

Burn...Flip...Burn...your discs are ready

LightScribe is an innovative technology that uses a special disc drive, special media, and label-making software to burn labels directly onto CDs and DVDs.

Because the labels are laser-etched—not printed—there's no ink, no smudging, and no peeling.

Your labels can be whatever you want them to be. Create one-of-a-kind designs with your own photos, text, and artwork using your label-making software. Or choose from the many free backgrounds the software provides

LightScribe discs from Moser Baer India are available in the following variants:

- CDR – Monochrome & Color
- DVDR – Monochrome & Color

About the Company

Moser Baer, headquartered in New Delhi, is a leading global technology company. Established in 1983, the company successfully developed cutting edge technologies to become the world's second largest manufacturer of Optical Storage media formats like CDs, DVDs and Blu Ray. Infact, it was among the first to market the next-generation of storage formats like Blu-ray Discs and HD DVD. It has the world's largest single location optical media factory, with strong in-house R&D. Its products are sold in over 80 countries, with EU, US and Japan taking majority share. World's top OEM brands buy from Moser Baer due to its superior technology, quality, cost competitiveness and respect for IP.

Recently, the company has transformed itself from a single business into a multi-technology organization, diversifying into exciting areas of Solar Energy, Home Entertainment and IT Peripherals & Consumer Electronics.

Moser Baer has over 6,000 full-time employees and multiple manufacturing facilities in the suburbs of New Delhi.
